

OSID-DE

WARNING: Failure to comply with the requirements below exposes the system to malicious interference which could disable alarm reporting

Xtralis takes Cyber Security seriously. To ensure your OSID-DE solution is not compromised by an external threat, please follow the instructions and take the following precautions.

Commissioning Requirements

- » All wiring and connection ports must be secured against unauthorized access.
- » OSID-DE devices must not be accessible from the Internet.
- » OSID-DE is not intended for remote access and no such facility should be provided.
- » Restrict access to OSID-DE devices to authorized persons.
- » Access to PCs on which Xtralis software is installed must be restricted to authorized persons.
- » Xtralis PC software such as OSID Diagnostics, must only be installed on PCs with current active Windows support from Microsoft.

System Maintenance Requirements

- » OSID-DE Imager diagnostic port must be used only for diagnostic purposes or firmware upgrade and must not be permanently connected to any device.
- » Limit use to authorized persons.
- » If an OSID-DE device requires firmware upgrade, ensure that the upgrade package is genuine and obtained directly from Xtralis.
