

Advanced Detection Global Services (ADGS) offers an Online Re-Certification Training Service on an interactive online training platform that enables certified channels and their employees remain proficient at the design, installation and commissioning, servicing and maintenance.

Online Re-Certification Training Service is the action of certification renewal that enables channel partners to renew their certified employees' existing VESDA accreditation certification by 2 years without undergoing full training.

Modules Covered In The Training:

- Introduction to ASD systems and main applications
- Product overview
- Design details
- Installation details
- Commissioning, testing and maintenance

Features

- Online recertification training at your own pace
- High degree of interactivity yielding greater engagement
- Assessment quiz at end of each module to identify any knowledge gaps
- On-demand downloadable certificate
- Registration and delivery using Honeywell Discover online platform

Key Benefits

- **Continued Accreditation:** simple mechanism to extend VESDA accreditation
- **Better Value:** no need to go through the full VESDA training
- **Active and Independent Learning:** the interactive training modules empowers effective learning
- **Accessibility:** easy registration and simplified payment system from anywhere at any time
- **Flexibility:** self-paced learning enables best use of time and fulfil learning objectives

How Does It Work

The ADGS VESDA Online Re-Certification Training Service is available through Discover platform; *Discover is an e-learning training platform that offers training courses at your convenience.*

Please visit Discover platform to register for training course/s.
