

ONLINE ON-DEMAND RE-CERTIFICATION TRAINING

ADGS VESDA AIR SAMPLING SMOKE DETECTION RE-CERTIFICATION TRAINING SERVICE (T-FIRE-XTRASDREC)

Advanced Detection Global Services (ADGS) offers an Online On-Demand Re-Certification Training Service on Xtralis University, an interactive online training platform. This enables the employees of certified channels to remain proficient in the design, installation and commissioning, servicing and Maintenance of the industry leading VESDA Aspiring Smoke Detection (ASD) range.

The online Re-Certification Training Service provides a simplified opportunity for certification renewal. A channel's existing certified employees can extend their VESDA accreditation by 2 years without undergoing full training.

Students have **six months** from the expiration of their certification to complete the re-certification course. If this period expires, they must undergo full accreditation training. A student can only re-certify once.

[How Do I Get the Re-Certification Online On-Demand Training Service?](#)

The training is available through [Xtralis University](#) platform; please visit the link to register for the training.
