

VESDA Subracks (J & K) Modules End of Life (EOL) Notice

April 2022

Overview

Considering our on-going review of our overall Advanced Detection Technologies portfolio, we have decided to discontinue VESDA Subracks with the following modules:

- Module J (VLC VN Display with 7 Relays)
- Module K (VLC VN display with No Relays)

The reason being, these modules only provide 3 alarm levels which are not compatible with VESDA-E variants.
