

VESDA IP66 Stainless Steel Enclosure End of Life (EOL) Notice

June 2026

Overview

As part of our on-going portfolio management and streamlining our offerings we have decided to discontinue the VESDA IP66 (stainless steel) enclosure. This product will no longer be available for new orders, subject to fulfillment of existing purchase orders and contractual commitments accepted prior to the date of this notice.

Affected Products

The discontinued product is shown in the table below:

Ordering Code	Description
020-050-SS	ASD ENCL IP66 (Stainless Steel)

Please note that the IP66 detector enclosure (SKU: 020-050-E) is still available for our VESDA-E series detectors (VEU, VEP, VES), as well as VESDA VLF detector. The table below lists some of its specifications:

SKU	020-050-E
Dimensions (H x W x D)	320 mm x 450 mm x 153 mm
Construction	Fully welded 1.5 mm mild steel grade 304 construction with a black lockable wing lock. Fully welded 2 mm glazed mild steel door.
Colour	RAL 7047 powder coat

Please refer to the data sheet (Doc. No. [36095](#)) for further information.

Alternative Products

As the IP66 stainless steel enclosure accessory will no longer be available for new orders, customers who require IP66-rated protection may wish to consider the VESDA VLI as an alternative solution, which incorporates IP66 protection within the detector itself, eliminating the need for a separate enclosure. The VESDA VLI is designed to operate across a wider range of environments and may serve as an alternative, depending on application requirements. Customers should evaluate the VESDA VLI against their specific application and environmental requirements to confirm suitability.

Effective Date

This product will be discontinued as of the date of this notice. Existing purchase orders and contractual commitments accepted prior to this date will be fulfilled in accordance with their terms.

Product Warranty

The standard product warranty for units already sold will continue to be honoured in accordance with the applicable Xtralis warranty policy for the relevant product line, in one of the two ways outlined below:

- A product that fails within the standard warranty period will be repaired or replaced with the same or a comparable product, which will carry the balance of the original warranty period.
- Should a product fail within the warranty period and be non-repairable or non-replaceable, we will, at our sole discretion, refund the original purchase price or issue a credit note of equivalent value, in each case within sixty (60) days of Xtralis confirming that the product is non-repairable or non-replaceable.

Contact

Please contact your Regional Sales Manager or Customer Service Representative for any queries in relation to this notice.
