

End of Life Notice

VESDA-E Analytics End of Life Notice

October 2nd, 2018

Overview

A recent assessment of the security of the VESDA-E Analytics server software revealed an area of potential vulnerability where the PC hosting the Analytics server may be open to active hacking. We have taken immediate action where we removed the Analytics server and associated files from the Xtralis website. Please note actual customer deployments of Analytics have been very limited.

Affected Products

The following table shows the Analytics related products that have been discontinued:

Discontinued Part Number	Description
VSW-801	VESDA-E Analytics DustTrace License
VSW-802	VESDA-E Analytics DieselTrace License
VSW-803	VESDA-E Analytics WireTrace License
VRT-X00	VESDA-E Analytics Remote with 7 Relays

Effective Date

This notice takes effect immediately as the Analytics server and associated files have already been removed from the Xtralis website.

Installed Base & Pending Orders

The installed base of the VESDA-E Analytics is very limited. Although Analytics is completely independent of alarm reporting and life safety, existing installations must immediately un-install the Analytics Server plus associated licenses. Any pending orders in the Xtralis system will also be cancelled.

Contact

Please contact your local Xtralis office for further queries in relation to this notice.
